

As 81 million Americans suffer from airborne allergies, Respiray Wear A+ emerges as a game-changing wearable device that offers instant, drug-free allergy relief.

A NEW, SCIENCE-BASED WAY TO DEFEAT ALLERGIES

Wear A+ is a wearable HEPA air purifier that captures 99.9% of airborne allergens

Instantly effective Provides continuous protection No side effects No ozone production Laminar airflow

“The device reduced the TSS by ~ 50% in birch pollen-allergic subjects, by 48% in patients with HDM allergy, and by 60% in cat-allergic subjects. Most anti-allergy medications do not relieve the symptoms to this extent.”

Karl-Christian Bergmann, Teresa Hartung and Torsten Zuberbier (Institute of Allergology, Charité-Universitätsmedizin Berlin and European Center for Allergy Research Foundation)

INSTANT ALLERGY RELIEF

- Hay fever (allergic rhinitis)
- Cat and dog allergies
- Dust mite allergies
- Fungal spore allergies

- Nasal blockage
- Runny nose
- Itchy, watery eyes
- Sneezing

Many common allergy relief methods come with side effects or other significant drawbacks

ALLERGY MEDICINE

- Take time to start working
- Cause side effects
- Only work for a limited time
- Require multiple doses
- Not suitable for everyone

STATIONARY AIR PURIFIERS

- Take time to clean the air
- Your proximity to the air purifier varies, leading to unreliable effectiveness

RESPIRAY WEAR A+

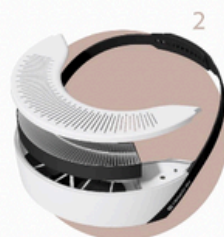

- Instantly effective
- No side effects
- Continuous protection
- Hands-free operation
- Constant proximity to the airways

HOW RESPIRAY WEAR A+ WORKS

The idea behind Respiray Wear A+ is that if you are not breathing in allergens, you won't develop an allergic reaction - it's that simple, and it's proven to work.

Air containing allergens is drawn into the device from below.

The H12 (MERV 17) filter in Wear A+ captures 99.9% of allergens.

The constantly renewing “shield” of clean air provides instant protection.

CLINICALLY TESTED AND GLOBALLY CERTIFIED

- ✓ Clinically tested by the European Centre for Allergy Research Foundation.
- ✓ Clinical trial findings published in the medical journal Allergologie Select.
- ✓ Lab tests by SGS North America showed 99.9% effectiveness at filtering airborne allergens.
- ✓ Respiray Wear A+ complies with the FCC, CE, IC and UKCA standards.

CLINICAL TRIALS REPORT*

Significant symptom reduction

Reduction in late phase reactions

Immediate protection

Enhanced personal well-being

Potential medication reduction

*Bergmann et al., Allergologie Select, 2024

FEATURES AND BENEFITS

Quiet H12 HEPA filter + washable pre-filter

Up to 8-hour battery life

One size fits all

Lightweight (0,65 lb)

Hands-free

No ozone

USB charging

Two airflows

WHEN TO USE WEAR A+

During hay season

When around pets

While cleaning the house

In moldy environments

The comfortable, user-friendly design of Respiray Wear A+ ensures hassle-free, year-round allergy relief at the click of a button. The device is intended for indoor use, but can also be used effectively outdoors on still days.

ABOUT THE COMPANY

Airborne particles, like allergens, can have significant consequences for our health. Respiray's mission is to give you access to cleaner, safer air whenever you need it, allowing you to breathe effortlessly and focus on what matters most.

It took a team of scientists and engineers, 2 years, and 117 prototypes to create the effective, drug-free allergy relief device that is Respiray Wear A+. The device is manufactured in Europe. The recommended retail price is USD 149.00

So far, we have invested \$4M USD and helped customers in 46 US states and 40 countries.
